

FreeStyle
Libre 2

Moving from the FreeStyle Libre 2 sensor to the **(NEW)** FreeStyle Libre 2 Plus – our first 15-day sensor

We're delighted to introduce you to the next generation of our sensor-based glucose monitoring technology for people living with diabetes. The FreeStyle Libre 2 Plus sensor offers all the ease of the FreeStyle Libre 2 system¹, but now even better².

Moving to the FreeStyle Libre 2 Plus sensor is easy.

Abbott continually strives to make technology improvements to our products to enhance the experience of patients and facilitate them to look after their diabetes more effectively. As part of our development, we are pleased to announce that the 'FreeStyle Libre 2 Plus sensor' is now available on the NHS BSA Drug Tariff.

All existing users of the FreeStyle Libre 2 sensor will require their repeat prescription changed to the FreeStyle Libre 2 Plus sensor.

The FreeStyle Libre 2 Plus sensor conveniently works with the existing FreeStyle LibreLink app¹ and the FreeStyle Libre 2 reader. No app updates or change of reader are required.

What's the difference between the FreeStyle Libre 2 sensor and the FreeStyle Libre 2 Plus sensor?

Just like the FreeStyle Libre 2 sensor, the FreeStyle Libre 2 Plus sensor is small, discreet¹ and convenient – now with added benefits:

Extended sensor wear

Easy to use and comfortable to wear for up to 15 days², only 2 sensors per month.

Even better performance³

Outstanding 15-day accuracy, including strong low-end performance¹, without finger pricks⁴.

For ages 2+

The FreeStyle Libre 2 Plus sensor is indicated for children 2 years and older⁵.

Partnerships with insulin pumps

Authorised to work with Insulet's Omnipod[®] 5 Automated Insulin Delivery System for people living with Type 1 diabetes.

The #1 sensor-based glucose monitoring system used worldwide⁶ – now even better

1. Data on file, Abbott Diabetes Care, Inc. **2.** Haak, T., *Diabetes Ther.* (2017): <https://doi.org/10.1007/s13300-016-0223-6>. **3.** Based on performance characteristics of the FreeStyle Libre 2 sensor and the FreeStyle Libre 2 Plus sensor. **4.** Finger pricks are required if glucose readings and alarms do not match symptoms or expectations. **5.** For children aged 2-12, a caregiver at least 18 years old is responsible for supervising, managing, and assisting them in using the FreeStyle Libre 2 system and interpreting its readings. **6.** Data on file, Abbott Diabetes Care, Inc. Based on the number of users worldwide for the FreeStyle Libre portfolio compared to the number of users for other leading personal use sensor-based glucose monitoring systems.

What you need to do

1. Change your patients' repeat prescription to the FreeStyle Libre 2 Plus sensor.

2. Inform your patients that their prescription will be changed. Your local Abbott representative can supply you with the necessary resources to update your patients of this change.

3. Ensure that the previous prescription of FreeStyle Libre 2 sensors [PIP: 416-3416] is removed from the patient's repeat record. The FreeStyle Libre 3 sensor is also available on the prescribing system*; please ensure you change the repeat prescription to the FreeStyle Libre 2 Plus sensor only.

Prescribing information.

The FreeStyle Libre 2 Plus sensor

PIP Code: 428-0194

2 sensors - 30-day wear

4 sensors - 60-day wear
