

## Devon Formulary systemic HRT treatment: Visual Summary

For full details of formulary choices, doses and additional guidance, refer to the Formulary: [N&E](#) / [S&W](#)

Review HRT 3 months after commencement or change, and annually

<sup>4</sup> Women taking sequential HRT over the age of 45 should be offered, after five years of use or by age 54 (whichever comes first), a change to continuous combined HRT
